WHAT IS 3PL?

THIRD-PARTY LOGISTICS (OR 3PL) REFERS TO THE OUTSOURCING OF LOGISTICS PROCESSES, INCLUDING INVENTORY MANAGEMENT, WAREHOUSING, AND FULFILLMENT.

Outsourcing logistics will give your organization the freedom to focus on its core competencies instead of getting involved in the management of non-core but critical functions.

Thus, when sales are down, there are no redundant investments and unutilized resources, and when there's a surge in demand, your business can upscale.

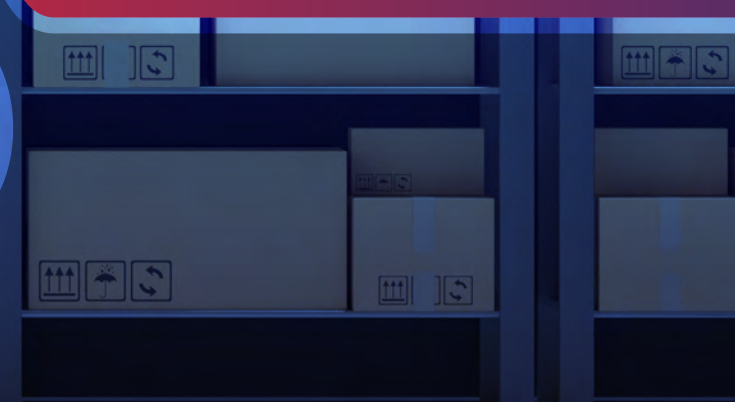

WHAT IS ON-DEMAND WAREHOUSING?

ON-DEMAND WAREHOUSING IS THE ABILITY TO ACCESS WAREHOUSING SERVICES AS AND WHEN REQUIRED WITHOUT THE NEED FOR LONG TERM COMMITMENTS.

Take advantage of the flexibility of being able to scale labor, space, and transportation services to your company's specific needs.

Pay only for the space you use, on-demand, not empty space. This new business model is a way to purchase warehousing space on an as needed basis.

TURN WHAT WAS A TRADITIONALLY FIXED EXPENDITURE INTO A VARIABLE COST.
